Education

Suranaree University of Technology

Bachelor of Engineering, Computer Engineering.

Nakhon Ratchasima, Thailand

2024

Experience

Generation Thailand

Junior Software Developer Bootcamp

Bangkok, Thailand

2026

- **Full-Stack Application Development:** Designed and developed a full-stack e-commerce web application for gaming gear utilizing modern frontend and backend technologies, including HTML, CSS, Tailwind CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and PostgreSQL in a collaborative team environment.
- **System Architecture & Database Design:** Created comprehensive system models including Business Model Canvases, Use Case Diagrams, Entity-Relationship (ER) Diagrams, and MongoDB schemas to align technical implementation with business requirements.
- **Version Control & Collaboration:** Managed source code, branching workflows, and team collaboration using Git and GitHub.
- **Agile Project Management:** Collaborated effectively within a cross-functional team utilizing Scrum-Agile methodologies to manage the project lifecycle, sprint planning, and iterative delivery.

Y.I.M Corporation

Frontend Developer Intern

Bangkok, Thailand

2021

- **Frontend Development:** Developed and maintained modern web applications as a Frontend Developer Intern utilizing HTML, CSS, TypeScript, Next.js, and Ant Design, partnering closely with backend engineering peers to integrate APIs and deliver seamless user experiences.
- **Version Control & Collaborative Workflow:** Implemented Git and GitHub for efficient source code management, branching strategies, code reviews, and cross-functional team synchronization.
- **Agile Engineering & Delivery:** Operated within a Scrum-Agile development environment, participating in team collaboration, iterative sprint cycles, and structured project workflows.

Skills

Technical Skills:

- **Frontend Development:** HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, Ant Design
- **Backend Development:** Node.js, Express.js
- **Database & Data Modeling:** MongoDB, PostgreSQL, Entity-Relationship (ER) Diagrams, Use Case Diagrams
- **Tools & Version Control:** Git, GitHub, Business Model Canvas (BMC)

Soft Skills:

- **Agile Collaboration:** Experienced in working within cross-functional and intern teams using Scrum-Agile methodologies, sprint planning, and iterative delivery.
- **Teamwork & Communication:** Effectively partnered with backend peers and cross-functional teammates to integrate systems, align technical requirements with business goals, and execute collaborative development workflows.
- **Adaptability & Continuous Learning:** Rapidly acquired new frameworks, tools, and professional software engineering practices across bootcamp and internship environments.
