Summary

Junior Software Developer with hands-on experience in full-stack web development using the **MERN stack**. Computer Engineering graduate with knowledge of **data structures and algorithms**, **OOP**, **computer networking**, and **database systems**. Experienced in building web applications and collaborating in Agile teams using Git and GitHub. Eager to continue developing technical skills and contribute to software development projects.

Skills

- **Languages:** JavaScript, TypeScript, SQL, HTML, CSS
- **Frontend:** React.js, Next.js, Tailwind CSS, Responsive Web Design
- **Backend:** Node.js, Express.js, RESTful APIs
- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git, GitHub, Postman, Figma, npm
- **Concepts:** OOP, Data Structures & Algorithms, Software Engineering, Computer Networking

Education

Suranaree University of Technology
Bachelor of Engineering in Computer Engineering

Nakhon Ratchasima, Thailand
2024

Experience

Generation Thailand

Bangkok, Thailand

Junior Software Developer Bootcamp

2026

- Developed a full-stack gaming gear e-commerce web application using React.js, Node.js, Express.js, MongoDB, JavaScript, and Tailwind CSS as part of a collaborative team.
- Designed system models, including Use Case Diagrams, ER Diagrams, and MongoDB schemas, to support application development.
- Managed source code and team workflows using Git and GitHub with feature branching and pull requests.
- Collaborated in an Agile/Scrum environment through sprint planning and iterative development.

Y.I.M Corporation

Bangkok, Thailand

Frontend Developer Intern

2021

- Developed and maintained frontend applications using Next.js, TypeScript, Ant Design, HTML, and CSS, collaborating with backend developers for API integration.
- Managed source code and team workflows using Git and GitHub, following feature-branching strategies and code review processes.
- Worked in an Agile/Scrum environment, participating in sprint planning, daily stand-ups, and iterative feature delivery.

Project

GEARVERSE – Gaming Gear E-commerce Web Application

React.js, Node.js, Express.js, MongoDB, Tailwind CSS

Github: [GEARVERSE](#)

- Built user registration and login features using React, Node.js, and Express.js, including password hashing and JWT-based authentication.
- Collaborated on RESTful API development, MongoDB schema design, Git branching, and pull requests within an Agile team.
- Designed responsive homepage wireframes and product user flows in Figma.
